FIRA COLLECTION 2026

BY FIRALUX DESIGN

EVERY LIGHT A STATEMENT.

With over 30 years of experience in design and engineering, Firalux Design AG stands for lighting solutions that combine precision, aesthetics, and durability. The new Fira collection combines high-quality materials, precise workmanship, and a consistently minimalist design.

Each component is milled from a single piece of aluminum, and each light is individually manufactured to order. Only proven components are used – for maximum reliability in use.

The wide range of colors and our signature Cappuccino color offer scope for architectural design – matching natural materials and modern room concepts.

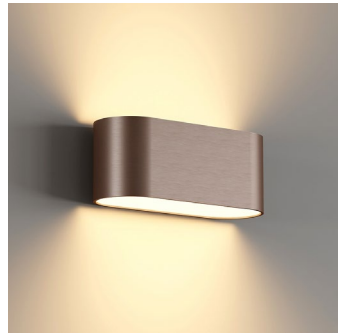

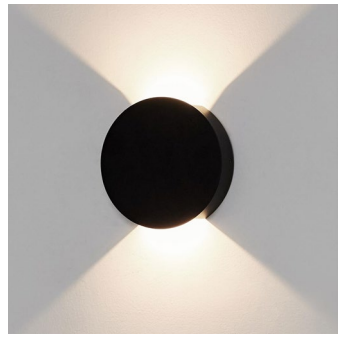

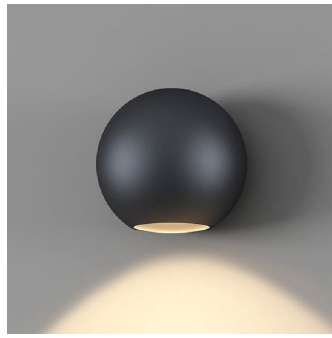

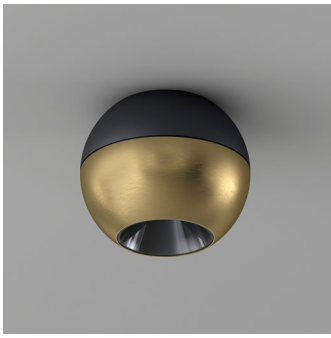

With a 5-year warranty and uncompromising quality, Fira is the choice for anyone who sees light as an integral part of their design.
